EDUCATION

Degree	Institution	Score
B.Tech CSE (Still studying 3-2)	TKR College of engineering and technology	7.63
Senior secondary 12th class	School of scholars CBSE	70%
Secondary high school 10th class	Krishnaveni high school SSC	8.2

PROJECTS

To design an online train ticket booking system: My idea is to design An webpage which helps passengers to book there train ticket in an easy And user friendly manner.This idea is under process not built yet.And have design an desktop version webpage of my one and the url of the websight is <https://smuggest-failures.000webhostapp.com/home.html> and the source code of this is in this GitHub link <https://github.com/vinay2132/AllBook>

Prediction of Sepsis from Clinical Data : My model analyzes this data from patients to identify subtle signs and symptoms that appear in patients with sepsis than those without sepsis. The data collected is given to our five different models which use different algorithms to detect Sepsis.The final statement is declared based upon the highest repeated output of these five models.

Designing an online menu generating IoT device: I am trying to design an Modal which generates an online menu and automatic tokening system for small and medium scale shopkeepers.

SKILLS

I am good at

Frontend web page like
HTML,JS

Backend web developer
like

nodeJS,PHP,XML

I am also good at
programming
languages like

C,Java,Python,R

AWARDS

I am a part of college
level

Internal Hackathon
College level Fest
I also working in
SIH(smart india
hackathon)
MSME

LANGUAGES

I am good at speaking
ENGLISH and outhur
languages
